Summary

- Experienced Python developer with 7+ years specializing in Django, FastAPI, and scalable web application architecture
- Proven technical leader with experience managing 5-10 member backend teams and driving digital transformation initiatives
- Full-stack expertise spanning from database design to cloud deployment, with hands-on experience in AWS, PostgreSQL, and modern DevOps practices
- Strong cross-cultural communication skills, currently collaborating remotely with international teams across Vietnam and Slovenia

Education

UIT – University of Information Technology

MS, Information Technology

2023 - Present — Ho Chi Minh City, Vietnam

PDU - Pham Van Dong University

Bachelor's degree, Information Technology

2014 - 2018 — Quang Ngai City, Vietnam

Professional Experience

Sgonware(HCM) - infinCUBE(Ljubljana)

Software Developer

Mar 2023 - Present — Ho Chi Minh City, Vietnam - Ljubljana, Slovenia · Remote

Key Contributions:

- Collaborate with European development team to deliver enterprise-level healthcare solutions
- Implement advanced search functionality using Elasticsearch for improved data retrieval performance

Professional Attitude

"My journey in software development has taught me that great architecture emerges from understanding both technical foundations and team dynamics. I'm committed to continuous learning and aspire to evolve into a Software Architect role, where I can design systems that not only solve complex problems but also empower teams to build sustainable, scalable solutions together."

- Develop responsive frontend components with Nuxt.js while maintaining robust Django backend APIs

- Participate in agile ceremonies and contribute to technical decision-making in cross-timezone environment

Projects: Simplisan

Technologies: `Django` `PostgreSQL` `Nuxt.js` `Elasticsearch`

hSpace(HCM)
Backend Leader
Sep 2020 - Dec 2022 — Ho Chi Minh City, Vietnam · Office

Key Achievements & Responsibilities:

- Architected and delivered a comprehensive innovation ecosystem serving startup incubation and digital transformation needs

- Led backend development team of 5-10 engineers, implementing agile methodologies and code review processes

- Designed and built marketing automation platform enabling behavior-driven customer engagement workflows

- Developed scalable social networking platform supporting real-time communication and user interactions

- Implemented microservices architecture with message queues (RabbitMQ) and caching layers (Redis)

- Established CI/CD pipelines using GitLab and GitHub Actions, reducing deployment time and improving code quality

Key Projects:

- **hSpace Ecosystem (2020):** Innovation startup ecosystem with HSCHOOL, HTARTUP and STRANFORM components

- **Marketing Automation (2021):** Behavior flow platform for customer engagement campaigns

- **Social Network (2021-2022):** Full-featured social platform for community building

Technologies: `Python` `Django` `FastAPI` `PostgreSQL` `MongoDB` `Celery` `RabbitMQ` `Redis` `AWS`

MINERVA TECHNOLOGY SOLUTIONS JSC
Software Developer
May 2019 - Aug 2020 — Ho Chi Minh City, Vietnam · Office

Responsibilities:

- Collected and analyzed requirements, providing technical solutions for customer problems

- Lead developer for Python web application development

- Conducted task estimation, progress reports, and comprehensive code reviews

Projects: Saigon Co-op (TPTS)

Technologies: `Python` `Django` `PostgreSQL` `JavaScript`

FTP SOFTWARE
Software Developer
Jan 2018 - Apr 2019 — Da Nang City, Vietnam · Office

Responsibilities:

- Analyzed customer requirements and developed comprehensive technical solutions

- Lead developer for Java-based web application development

Projects: Piary (JP), Kisoji (JP)

Technologies: `Java` `Spring Boot` `Spring MVC` `AngularJS` `SQL Server` `MySQL`
