PROFESSIONAL SUMMARY

Senior Software Engineer and emerging System Architect with **7+ years** of hands-on experience designing and delivering **high-availability, distributed backend systems** using Python, Django, and FastAPI. Proven track record of leading cross-functional engineering teams of 5–10 engineers in Agile environments, driving microservices adoption, and reducing deployment overhead through robust CI/CD automation. Currently collaborating with an EU-based healthcare software team (Ljubljana, Slovenia), demonstrating strong cross-cultural communication and remote collaboration skills. Passionate about scalable system design, cloud-native architecture, and mentoring high-performing engineering teams.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL
Backend Frameworks: Django, FastAPI, Spring Boot, Spring MVC, Celery
Frontend: Nuxt.js, AngularJS
Databases: PostgreSQL, MongoDB, MySQL, SQL Server
Cloud & Infrastructure: AWS (EC2, S3, RDS, Lambda), Docker, Nginx
Messaging & Caching: RabbitMQ, Redis
Search: Elasticsearch
DevOps & CI/CD: GitLab CI, GitHub Actions, Linux
Architecture & Design: Microservices, RESTful APIs, System Design, Design Patterns, High Availability, Scalability
Methodologies: Agile, Scrum, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

Sgonware (HCM) · infinCUBE (Ljubljana) Mar 2023 – Present
Software Developer — Healthcare Enterprise Solutions Ho Chi Minh City, VN · Remote (EU)

- Collaborated with a cross-timezone European engineering team to architect and deliver an enterprise-grade healthcare platform (**Simplisan**), meeting strict EU compliance and data security requirements.
- Reduced search latency by **~40%** and improved data retrieval accuracy across **50k+ medical records** by designing and implementing an Elasticsearch-powered advanced search module.
- Built and maintained scalable REST APIs using **Django**, enabling seamless integration with Nuxt.js frontend components and third-party healthcare services.
- Actively participated in Agile ceremonies (sprint planning, retrospectives, code reviews) within a cross-cultural, multi-timezone engineering environment.
- Tech Stack:* Django, PostgreSQL, Nuxt.js, Elasticsearch, Docker

hSpace Sep 2020 – Dec 2022
Backend Team Leader — Innovation Ecosystem Platform Ho Chi Minh City, VN · On-site

- Led backend architecture and development of a multi-product innovation ecosystem (**hSpace**), comprising startup incubation, education (HSCHOOL), and digital transformation (STRANFORM) modules — designed to support a growing community of startups and SMEs.
- Managed and mentored a backend engineering team of **5–10 engineers**, establishing Agile workflows, pull request standards, and code review processes across **3 concurrent product lines**.
- Designed a **Marketing Automation Platform** (2021) with behavior-driven workflow engine, architected to support personalized customer engagement campaigns at scale.
- Architected a **Social Networking Platform** (2021–2022) with real-time communication via **WebSocket** and asynchronous task processing via **Celery + RabbitMQ**, designed for horizontal scalability.
- Implemented **microservices architecture** with Redis caching to decouple services and improve system resilience; validated performance improvements through internal benchmarking and load testing.
- Established **CI/CD pipelines** using GitLab CI and GitHub Actions, standardizing the deployment workflow and significantly reducing manual release overhead.
- Provisioned and managed **AWS infrastructure** (EC2, S3, RDS) to support cloud deployment, environment isolation, and disaster recovery planning.
- Tech Stack:* Python, Django, FastAPI, PostgreSQL, MongoDB, Celery, RabbitMQ, Redis, AWS

Minerva Technology Solutions JSC May 2019 – Aug 2020
Software Developer — Python Web Applications Ho Chi Minh City, VN · On-site

- Served as **lead developer** for Saigon Co-op’s internal Transaction Processing System (**TPTS**), delivering requirements analysis, technical solution design, and full-cycle implementation.
- Conducted task estimation, progress reporting, and code reviews across a team of junior developers, ensuring on-time delivery and code consistency.
- *Tech Stack:* Python, Django, PostgreSQL, JavaScript

FPT Software
Software Developer — Java Enterprise Applications

Jan 2018 – Apr 2019
Da Nang City, VN · On-site

- Developed enterprise-grade Java web applications (**Piary, Kisoji**) for Japanese clients, following rigorous offshore delivery standards and Japanese software quality norms.
- Analyzed customer requirements in a cross-cultural Japanese–Vietnamese context, translating business logic into maintainable Spring Boot solutions.
- *Tech Stack:* Java, Spring Boot, Spring MVC, AngularJS, SQL Server, MySQL

EDUCATION

University of Information Technology (UIT – VNU-HCM)
Master of Science, Information Technology

2023 – Present
Ho Chi Minh City, Vietnam

Pham Van Dong University (PDU)
Bachelor of Science, Information Technology

2014 – 2018
Quang Ngai City, Vietnam

LEADERSHIP & SOFT SKILLS

Team Leadership: Managed and mentored engineering teams of 5–10 members across multiple concurrent products.

Cross-Cultural Collaboration: Remote work experience with EU-based teams (Vietnam ↔ Slovenia).

Communication: Clear technical communication with both engineering teams and non-technical stakeholders.

Agile Planning: Sprint planning, backlog grooming, and retrospectives across 3+ years of Agile environments.
